

Healthy Food Game in Java Script Language

How to Play the Game

My objective is here to create opportunities for learning about healthy food in many ways besides cooking and eating: you can use games, crafts, songs and dance. For instance, instead of playing the classic games , make up a life-size

```
“Healthy Food” game board.  
if (kids eats== healthy food) {  
life = "Healthy, Joyful, long, :) "  
}
```
